MCS Clinical Biometrics Services

MAXIS
CLINICAL SCIENCES

Who We Are

Maxis Clinical Sciences, headquartered in the USA, is a globally recognized Integrated Research Competence Center and Specialized Management Consulting Firm. We stand as an industry leader in providing Clinical Biometrics Services. Specializing in data integrity, precision, and analytics, MCS has an outstanding history of supporting clinical trials in diverse therapeutic areas. Our all-inclusive services prioritize detailed data collection and management, thorough statistical analysis, and clear reporting for the pharmaceutical and life sciences sector.

We champion the transformative potential in small to medium-sized innovators, driving healthcare transformation through novel drugs, therapies, and digital solutions.

Key Differentiators

- **Purpose-fit Solutions:** Tailored approaches to meet diverse project needs.
- **Real-time Monitoring:** Swift identification and resolution of issues, ensuring consistent project execution.
- **Technology Integration**: Capability to seamlessly integrate with over 40 of clients' existing technologies.
- **Positive Client Feedback**: Exceptional score of 9 reflecting our proficiency in technical integration and client satisfaction.
- **Team Deployment**: Teams that are not only skilled but can be readily deployed to address diverse requirements.
- **Operational Excellence**: Strict contracts and IT system monitoring to prevent moonlighting, ensuring dedication and commitment.

Key Services & Expertise

Data-Oriented Services

- Data Management
- Statistical Programming
- Biostatistics
- Advanced Analytics & Visualization
- Patient-Centric Analytics
- Data Compliance & Standards Management

Operational & Consulting Services:

- Monitoring & Oversight
- Medical Writing
- Quality Assurance & Control
- Regulatory Compliance

Proven Success Metrics

90% On-time delivery rate

24/7 Global Delivery

3+ Regions (US, EU and India) with purpose-fit FSP Teams

3 of Top 10 pharmaceutical companies as clients

300+ Global talents dedicated to FSP models

30% Proven Cost Reduction

Compliance Credentials

FDA 21 CFR Part 11

ICH GCP compliant

Case Studies Highlight

- A top **biopharmaceutical company** based in Cambridge, MA, required in-depth data management, visualization, and standards solutions. MCS's response was to deploy a team of 50 SMEs globally, focusing on high-quality drug development projects, integrating biometrics and site monitoring, among others. This resulted in reduced manual effort through automation and significantly improved data quality.

- Another collaboration with a **medical device subsidiary** in Florida, USA, saw MCS provide a holistic solution to manage clinical data quality and support clinical reviews. The partnership led to a reduced cycle-time and a successful 5-year agreement renegotiation.

Biometrics Resources - Current Teams

- **Programming Resources**: Varied skills in Statistical, R Programmers, and Macro Programmers.
- **Biostatisticians**: 5+ years to Principal Managers.
- **Service Leads**: Global Service Leads, Service Leads.
- **Validation / User Acceptance Testing Leads**: UAT (Leads, Senior).
- **Clinical Data Management**: Expertise in EDC programming including Spotfire, Veeva CTMS, ClinTrial, Inform Database, Oracle Clinical and, Medidata Rave programming.
